41-BOTTLE SINGLE-ZONE WINE COOLER (STAINLESS)

Store your wine collection in this elegant Vinotemp 41-Bottle Single-Zone Wine Cooler. Featuring seamless, all-glass technology, this wine refrigerator has room to store up to 41 bottles on six telescopic shelves and 1 bulk storage section. A digital temperature touchscreen controller located at the top of the cooler allows you to see and set the temperature without having to open the cooler door. Its patented interior Backlit™ panel lighting has three different color options - Heliotrope, Amber, and Vinotemp BioBlu™ (which helps reduce the growth of bacteria and mold) - and can be selected at any give time. This wine refrigerator is front venting with easy installation to build in and fit perfectly in any kitchen or bar area. Sturdy, stylish patented label forward VinBo™ Racks cradle bottles so the labels of wine stored are front facing while the racks glide and extend forward, adding to the cooler's visual appeal and ease of use. A full glass door with stainless steel edge and door lock add to the style and functionality of this cooler. This wine cooler will make your small to medium sized wine collection stand out.
