141-Bottle Single-Zone Wine Cooler (STAINLESS)

This elegant 141-Bottle Single-Zone Wine Cooler has innovative features such as telescopic shelves, label forward wine bottle display, interior Backlit™ in three different colors, and LED side lighting to maximize your display capability. This wine refrigerator is front venting with easy installation to build in and fit perfectly in any kitchen or bar area. The commercial style wine cooler is an entertainer's delight with three different color options to display whatever mood fits. The design forward wine cooler features vibration-damping design to better protect its contents and is engineered for low energy consumption and low noise. A digital temperature touchscreen controller located at the top of the cooler allows you to see and set the temperature without having to open the cooler door. Its patented interior Backlit™ panel has three different options - Heliotrope, Amber, and Vinotemp BioBlu™ (which helps reduce the growth of bacteria and mold) - and can be selected at any give time. Adjustable temperature range allows users to select a proper, customized storage and serving temperature for light or darker wines. Sturdy, stylish patented label forward VinBo™ Racks cradle bottles so the labels of wine stored are front facing while the racks glide and extend forward, adding to the cooler's visual appeal and function. A full glass door with stainless edge and door lock add to the style and functionality of this cooler. This wine cooler will make your large sized wine collection stand out.
