## **Vinotemp 41-bottle Single-zone Wine Cooler Recognized With 2020 Good Design Award**

*Visually stunning 41 bottle capacity award-winning cooler combines styles and functionality*

Henderson, Nevada (January 12, 2021) – [Vinotemp®](https://www.vinotemp.com), the leading wine storage solutions and appliance provider, today announced its 41-Bottle Single-Zone Wine Cooler has been recognized with a [2020 GOOD DESIGN® Award](#) – the most prestigious, and oldest design awards program organized annually by The Chicago Athenaeum Museum of Architecture and Design.

"If it's backlit, it's a Vinotemp! We've had a great response to our unique backlit interior lighting and label-forward wine rack features," said India Hynes, CEO, Vinotemp. "The 41-Bottle Single Zone Wine Cooler boasts technological advancements, commercial-grade wine storage capabilities, and a number of industry-first features – all of which enhance the wine cooler's performance as well as its visual appeal. With this product we wanted to deliver these popular features in a consumer-focused option and the 41-Bottle Single-Zone Wine Cooler does just that while making functional wine storage colorful."

As the only wine cooler recognized in the 2020 GOOD DESIGN Awards "Retail Fittings" category, the [Vinotemp 41-Bottle Single-Zone Wine Cooler](#) is the most colorful solution for properly storing up to 41 bottles of wine. The wine cooler is available in three finishes – white, black and stainless steel – and features unique form and function details that make it worthy of award recognition such as:

- **Patented Backlit interior lighting**

The cooler is equipped with three visually stunning LED options – Heliotrope, Amber and Vinotemp BioBlu™ – which can be custom selected at any given time, and the BioBlu option helps prevent mold growth.

- **Patent pending wine racking**

Six pull-out, label-forward VinBo™ Wine Racks (along with a bulk storage area at the bottom of the cooler) make it simple to stylishly store up to 41 bottles of wine.

- **Customizable Temperature Control**

An adjustable 26-degree temperature range (39-65°F) allows users to select a proper, customized storage climate and serving temperature for light or dark wines.

- **Easy Installation**

Front vented and designed for built-in or freestanding installation, the cooler makes it simple for wine connoisseurs to add proper undercounter wine storage anywhere in the home.
