FOR IMMEDIATE RELEASE

VINOTEMPS STAINLESS STEEL WINE & BEVERAGE COOLER PROVIDES ELEGANCE AND FUNCTIONALITY

A perfectly sized refrigerator for any kitchen or bar area fits 32 wine bottles!

Henderson, Nevada (September 21, 2021) – [Vinotemp®](http://Vinotemp.com), the leading wine storage solutions and appliance provider, is reintroducing the 32-Bottle Stainless Steel Wine & Beverage Cooler. Incorporating their new Backlit™ patent design, the 32-bottle cooler offers panel lighting with three different color options that can be changed at any time: Heliotrope, Amber, and Vinotemp BioBlu™ - which helps reduce the growth of bacteria and mold.

"The sleek, clean design, functionality and size of this wine cooler made it so hard to resist that we brought it back by popular demand!" states India Hynes, CEO of Vinotemp. "The 32-Bottle Wine & Beverage Cooler delivers it all in two installation options: built-in or freestanding."

The 32-Bottle Single Zone Wine Cooler has a seamless all glass and stainless steel or black door for an elegant design that showcases your wine collection in style. In addition, the cooler features:

- **The perfect size with great storage capacity**
Approximately 32 standard-sized bottles of wine can be stored and the bulk bottom storage can hold any beverages that need to be chilled.
- **Easy-to-adjust beverage storage and access**
The cooler's wine zone features slide-out shelves and a glass door, allowing bottles to be easily viewed and removed.
- **Customizable and convenient storage temperatures**
There is a digital temperature control panel on the door allowing you to change the temperature without opening the door, making customizing the temperature of the two zones simple. The wine zone features a 31-degree temperature range (41°-68°F) to ensure the optimal drinking temperature for a variety of wines from vintage sparkling (recommended optimal drinking temperature, 48°F) to full bodied reds (recommended optimal drinking temperature, 64°F).
